

## CLAIMS

1.(amended) A molded article made predominantly of pulp and comprising a bottom portion and a body portion, wherein the angle between the outer surface of a side wall of said body portion and the ground contact plane of said bottom portion is 85° or greater, the height of said body portion is 50 mm or more, and said molded article has corners whose thickness is greater than the thickness of other portions.

2. The molded article according to claim 1, which is seamless.

3.(amended) A molded article made predominantly of pulp and comprising a bottom portion, a body portion and an opening portion, wherein said body portion has a depression or a projection, or said opening portion has an extension extending inward from the peripheral edge thereof, said depression or said projection is continuous only in the horizontal or oblique direction provided that said depression or said projection is continuous in a straight line, said body portion is seamless, and said molded article has corners whose thickness is greater than the thickness of other portions.

4.(amended) The molded article according to claim 3, which has a wall thickness is 0.1 mm or more and has corners whose thickness is greater than the thickness of other portions.

5. The molded article according to claim 3, which has a lid for opening and closing said opening portion of said molded article and/or a measuring container, said lid and/or said measuring container being linked with said molded article by integral molding via a first hinge and/or a second hinge which is/are thin and dense.

6. The molded article according to claim 3, which has a lid for opening and closing said opening portion of said molded article, said lid being a part prepared separately from said molded article and fixed to said molded article via a linking part having a hinge, said linking part being provided on said lid.

7. The molded article according to claim 3, wherein the upper surface of said opening portion of said molded article is covered with a seal, and a measuring container is removably set on said seal.
